Seasonal Greetings

*Non stop Research,
Always Innovating
Best Wishes 2012*

The year 2011 has been very promising for the CRITT M2A.

Today, our Center is well known in the world of the European automotive industry and now, we can proudly promote our name worldwide.

Our growth results from many years of work, a work that has led to the arrival of new skills in our team. As well as the outcome of long time partnerships built with actors of the automotive industry, local & national organizations and State entities.

Thus, our success is also yours, you who have been supporting, following or advising us for these last years. That is why the whole team of the CRITT M2A is joining me to thank you and wish you happiness and success for 2012.

« Our strategy now turns towards the development of our skills to bring more value to our studies. We can provide our customers more than just testing means. »

*J. Bodelle,
l'Avenir de l'Artois,
2011, October 20th*

Latest arrivals at the CRITT M2A

As previously announced, 2011 would be the year of increasing competences. Our company achieved this goal!

- 2 technicians strengthened our turbo testing team,
- 1 Quality & Metrology graduate engineer,
- 1 Acoustics & Metrology technician.

Several students also joined us:

- 1 engineer apprentice
- 1 maintenance apprentice
- 1 welding apprentice

Moreover, the CRITT M2A recently hired a PhD student to work on the fluid-dynamic rotor-stator interaction.

« Born only 11 years ago, CRITT M2A is becoming one of the main testing centers, as it now provides its services both Europe and in America »

Scientific Council, 2011, Oct. 11th

Thanks to its increasing presence on the international stage, the CRITT M2A now provides about 50% of its services abroad. But we do not forget our regional and national partners!

To keep contact with the latter, we exhibit every two years at the Normandy Motor Meetings in Rouen and we also invite and gather all our contacts to our annual Scientific Council: a meeting meant to federate all our partners around our R&D activities.

Each of these events is an opportunity, for us, to assess the quality of the actors of the automotive industry and R&D. It also allows us to show our involvement into many collaborative R&D projects, which help the development of our skills and more generally, that of our company.

Beyond these commercial aspects, exhibitions and internal events are a good opportunity to meet our partners.

So, note in your diaries and visit us on our stands or in our Center in 2012!

Agenda Beginning of 2012

Institution of
**MECHANICAL
ENGINEERS**
