**Henkel**

For the past 3 years, the French automotive industry expert **CRITT M2A** has been providing turbocharger testing services for turbocharger manufacturers and car manufacturers. Its Turbocharger Test Center is composed of 5 high standard gas stands, including one specially dedicated to Motorsport Automotive Industry, which offers output power levels of 800kW. This gas stand covers a mass flow up to 1.00 kg/s and a temperature of 1200°C. Repeatability of mass flow, temperature and pressure can be precisely adjusted to simulate any operating condition of the turbocharger tested.

**CRITT M2A** always pays close attention to preserving the confidentiality of its customers. Indeed, it offers cells with secured access to enable its customers to have private workshops and offices. **CRITT M2A** is a flexible SME, which allows us to be responsive and to manage various customer requests dealing with planning constraints with a high quality test follow-up. We work in collaboration with our customers by proposing various possibilities of partnerships and our team remains flexible in order to meet the specific demands.

**CRITT M2A** regularly invests to improve its skills and to update its turbocharger testing capacities. Our turbochargers references in Europe and worldwide are continuously increasing.
