An optimal visibility at exhibitions and conferences

The Electrical Test Centre gains strength!

CRITT M2A partners with Millbrook to develop its range of tests

Join CRITT M2A!

FORTHCOMING EVENTS

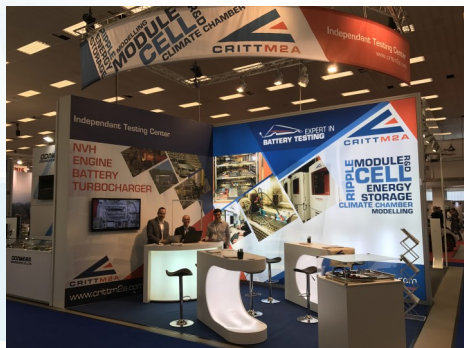

An optimal visibility at exhibitions and conferences

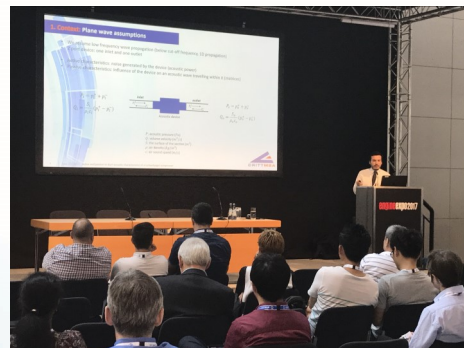

Recognized for many years in the market, CRITT M2A is now expected and noticed at the biggest exhibitions and conferences dedicated to its activity.

It is attending specialized conferences about turbocharger, engine, NVH and more recently electricity and energy storage, and also trade shows dedicated to automotive testing such as the **Automotive Testing Expo Europe** in Stuttgart.

In 2017, CRITT M2A participated for the first time in the **Electric & Hybrid Vehicle Technology Expo**, in Sindelfingen, to present its range of electrical tests, which was very well received there.

Electric & Hybrid Vehicle Technology Expo(4-6 April 2017)

Engine Expo (20-22 June 2017)

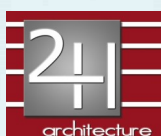

These trade fairs are an opportunity for **CRITT M2A** to present its know-how, to develop its reputation and make new contacts while maintaining an active technological watch on new market trends. In 2017, the CRITT M2A delivered two presentations on acoustic intensity measurements in the compressor ducts during the **Engine Expo** show in Stuttgart and the **23rd French Mechanical Congress** in Lille.

CRITT M2A also invites you every year to the **SYTEC**. This annual symposium taking place in October is a unique opportunity to discover the centre and its **R&D projects** during a convivial moment.

The Electrical Test Centre gains strength!

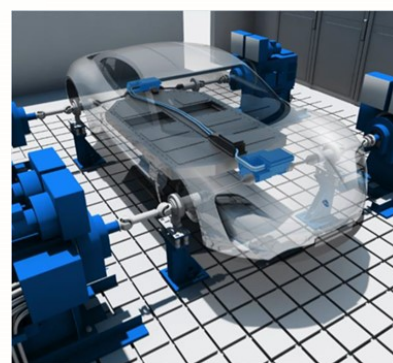

Established 2 years ago, the CRITT M2A's Electrical Test Centre is now fully operational.

Constantly attentive to the latest technologies by ensuring a technological watch, CRITT M2A has been able to **anticipate the needs** for the electrical activity and continues its **development**.

The Centre will be **expanded in 2018** and will have new equipment which will be provided by **AVL**:

- 6 battery pack test benches (up to 750 kW, 1200 V, 1800 A)
- Full 4WD Vehicle with test bed (400 kW)

This equipment will be installed in **WEISS climate chambers** (from 14 to 19m³).

This project calls for an extension and the **construction of 1,500 m²** with a budgeted cost totalling **€9.6 million**. Work will begin in the first half of 2018 with commissioning of the first part by the end of the year.

To support its development, CRITT M2A will launch a **recruitment campaign** from September 2018, mainly for **electrical technicians**.

CRITT M2A partners with Millbrook to develop its range of tests

CRITT M2A and Millbrook test centre decided to **work together** to propose testing services to their customers. Millbrook is an independant testing and validation centre, based in the UK and in Finland.

Both centres are recognized for their **expertise** and **test facilities** internationally and will now be able to **facilitate the management of a customer project** by offering a more complete offer. CRITT M2A customers could have access to more services while keeping a **single supplier**. This partnership will allow testing of the entire vehicle transmission, from the powertrain to the batteries, and acoustic tests on the vehicle and its components.

Alex Burns, President, Millbrook Group, said « This is an **important step forward in broadening our portfolio of services**. It is key to ensuring that our customers have easy access to the support they need, whatever the programme ».

Join CRITT M2A!

You want to join a firm with **human values**? At CRITT M2A, our employees are the **wealth** of the company!

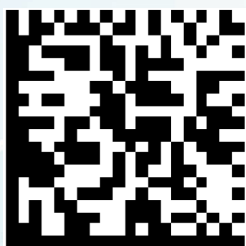

Thanks to a **dynamic team** and a perfect **mastery of its test means**, CRITT M2A is developing successfully. With a very strong **growth** potential, it is attracting more and more talents recognized by leading automotive professionals.

In 2017, CRITT M2A hired new employees (metrologist, service technician, electrical technician, accounting and administrative assistant, sales assistant, turbocharger engineer...).

To support the development of the Centre, **CRITT M2A** wishes to **hire** immediately:

- [2 expert engineers for the electrical test Centre](#) (H/F)
- [1 NVH technician](#) (H/F)
- [1 turbocharger technician](#) (H/F)
- [2 electrical technicians](#) (H/F)
- [1 metrologist technician](#) (H/F)
