REVIEW ON SYTEC 2021

SyTec 2021

Organized in partnership with **FEAL** Automotive and **ARIA Hauts-de-France**, the **SYTEC 2021** was marked by the inauguration of our electrical test center which transformed **CRITT M2A** to enter into the **electromobility** era.

We were very proud to host **Yann VINCENT, CEO of ACC** and **Frédéric MOTTE, President of REV3** to officially launch this event with strong testimonies. **Visits** of the testing centre, **vehicle animations** and **cocktail party** have followed to end with a Gala Dinner in a friendly atmosphere.

Hosted by **Stéphanie CANSSELL**, the second day dedicated to technical conferences started with a speech by **Rodolphe DELAUNAY**, Senior Vice President at Toyota Motor Manufacturing.

It was an opportunity to highlight the **R&D** projects carried out at **CRITT M2A** thanks to expert speakers, all of whom are highly appreciated.

Presentations on rich and varied subjects punctuated this day with a **round table** on «**Is hydrogen the future of the automobile?**» which aroused many discussions and questions.

Beyond the technical aspect of these two days, we offered our guests a **driving experience** aboard the BMW 330-e and Jaguar I-Pace vehicles, as well as an animation to discover the **connected glasses** that will be offered to our customers to follow the tests.

High level speakers, rich and specific program, more and more participants, all this in a warm atmosphere.

We are very proud of the success of the **SYTEC 2021** and will be glad to welcome you for the next edition!
